

Project Design Phase-II

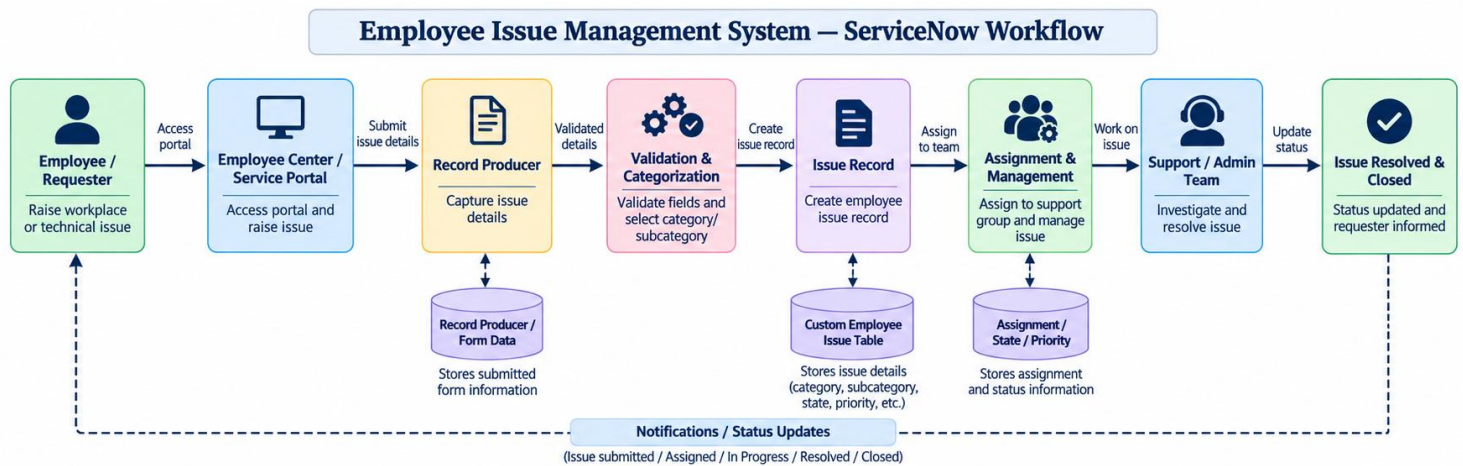

Data Flow Diagram & User Stories

Date	6 September 2026
Team ID	Individual
Name	Noshma Chowdary Uppuluri
Project Name	Employee Raise Issue – Record Producer & Service Portal Integration
Maximum Marks	4 Marks

Data Flow Diagrams:

The Data Flow Diagram shows how a software installation request moves through the ServiceNow system, from employee submission through approval and IT fulfillment.

DFD Level 0 – Software Installation Request Automation

Source / Actor	Process / System	Data Flow	ServiceNow Table / Record	Output / Next Step
Employee / Requester	Employee Center	Issue description, category, subcategory, requester details	Record Producer / Custom Issue Record	Issue submitted
Employee Center	Record Producer	Submitted issue information	Record Producer	Issue data captured
Record Producer	Validation & Categorization	Category, subcategory, required fields	UI Policies / Dependent Choices	Validated issue information
Validation & Categorization	Issue Record	Validated issue details	Custom Employee Issue Table	Issue record created
Support / Admin	Assignment & Management	State, priority, assignment group	Custom Employee Issue Table	Issue assigned and tracked
Support Team	Issue Resolution	Resolution details and status	Custom Employee Issue Table	Issue resolved / closed

Data Flow Summary:

Employee → Employee Center → Record Producer → UI Policies & Dependent Choices → Custom Employee Issue Record → Assignment / Issue Management → Support Team Resolution → Issue Resolved & Closed

User Stories

The following user stories define the functional requirements for the Employee Issue Management System project.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Employee (Requestor)	Issue Submission	USN-1	As an employee, I can access the Employee Center and raise a workplace or technical issue.	The employee can access the issue submission option and successfully open the issue form.	High	Sprint-1
Employee (Requestor)	Issue Submission	USN-2	As an employee, I can provide the required issue details such as category, subcategory and description.	Required fields are completed and the issue can be submitted successfully.	High	Sprint-1
Employee (Requester)	Issue Categorization	USN-3	As an employee, I can select an appropriate category and subcategory for my issue.	Relevant subcategories are displayed based on the selected category and the selected values are stored correctly.	High	Sprint-1
System / ServiceNow	Data Validation	USN-4	As the system, I can validate the information entered by the employee using UI Policies and required fields.	Mandatory fields are enforced and inappropriate or incomplete submissions are prevented.	High	Sprint-1
System / ServiceNow	Record Creation	USN-5	As the system, I can create an employee issue record from the submitted information.	A unique issue record is created containing the requester, category, subcategory, description and other required details.	High	Sprint-1
Support / Admin	Issue Management	USN-6	As a support/admin user, I can assign an issue to the appropriate support group.	The issue can be assigned to the appropriate group and the assignment information is saved successfully.	High	Sprint-2
Employee (Requestor)	Request Tracking	USN-7	As an employee, I can track the status of my submitted issue.	The employee can view the current status of the submitted issue, such as New, In Progress, Resolved or Closed.	Medium	Sprint-2
Employee (Requestor)	Notifications	USN-8	As an employee, I can receive updates about important changes to my issue.	The employee receives relevant status or resolution updates when applicable.	Medium	Sprint-2
