

Project Development Phase

Project Testing & Validation

Date	20 September 2026
Team ID	Individual
Project Name	Employee Issue Management through a Custom ServiceNow Application and Service Portal
Maximum Marks	4 Marks

Employee Issue Management Testing:

Project team shall fill the following information in the project testing and validation template. The table is adapted to the implemented ServiceNow Employee Issue Management application.

S.No.	Parameter	Values	Screenshot
1	Custom Application	Employee Center scoped application is created and accessible as the current application.	Add screenshot of the Employee Center application / Studio page.
2	Custom Table & Fields	Employee Raise Issue table is created with auto-numbering and the required fields: Number, Requester, Category, Subcategory, Short description, State, Priority, and Assignment Group.	Add screenshot of the table and configured fields.
3	UI Policy – Mandatory Field	When State is New, Short description becomes mandatory.	Add screenshot showing State = New and mandatory Short description.
4	UI Policy – Read Only	Number field is configured as read-only and cannot be manually edited.	Add screenshot showing the read-only Number field.
5	Category / Subcategory Dependency	Category controls the available Subcategory values: Network→VPN, Hardware→Laptop, Software→Server, Access→Forgot password.	Add screenshot showing Category/Subcategory dependency.
6	Record Producer	Raise Employee Issue record producer is created and connected to the Employee Raise Issue table with five mapped variables.	Add screenshot of the Record Producer and variables.
7	Service Portal Configuration	Requesting Portal is configured with employee_request URL suffix, homepage, knowledge page, login page, menu, logo, 404 page, and theme.	Add screenshot of the Service Portal configuration.
8	Custom Widgets	Commercial widget and Link Redirect/Raise an Issue widget are created using HTML/CSS; the redirect widget also uses a Client Script.	Add screenshots of the two widgets in Widget Editor.
9	Adding 2 Widgets to the Page	Both custom widgets are added to the Employee Center portal page through Service Portal Designer.	Add screenshot of the portal designer showing both widgets.
10	Portal & End-to-End Validation	The Requesting Portal loads, widgets are visible, Raise Ticket redirects to the Record Producer, and issue submission can be completed while configured UI policies and dependency are enforced.	Add screenshot of the final Requesting Portal and submitted issue.
