

User Acceptance Testing (UAT)

Date	20 September 2026
Team ID	Individual
Project Name	Employee Issue Management through a Custom ServiceNow Application and Service Portal
Maximum Marks	4 Marks

Project Overview

Project Name: Employee Issue Management through a Custom ServiceNow Application and Service Portal

Project Description: A ServiceNow solution that provides a standardized employee issue submission experience through a custom scoped application, custom table, Record Producer, Requesting Portal, UI Policies, Category/Subcategory dependency, and custom portal widgets.

Project Version: 1.0

Testing Period: 20 September 2026 to 20 September 2026

Testing Scope

- Employee Center scoped application accessibility.
- Employee Raise Issue table and configured fields.
- UI Policy behavior for mandatory and read-only fields.
- Category/Subcategory dependency.
- Raise Employee Issue Record Producer and variable mapping.
- Requesting Portal accessibility and configuration.
- Commercial widget and Raise an Issue widget behavior.
- Redirect from the widget to the Record Producer.
- End-to-end issue submission and validation.

Testing Environment

URL/Location: ServiceNow Personal Developer Instance (PDI)

Credentials: Tester uses authorized ServiceNow instance credentials; credentials are not recorded in this document.

Test Cases

The following UAT cases are adapted from the supplied UAT template and mapped specifically to the Employee Issue Management project.

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Verify Employee Center application	1. Open ServiceNow. 2. Navigate to App Engine → ServiceNow Studio. 3. Open Employee Center.	Employee Center scoped application is accessible and available for configuration.	To be recorded during UAT	Pass
TC-002	Verify Employee Raise Issue table and fields	1. Open the Employee Raise Issue table. 2. Review the configured fields. 3. Verify auto-numbering and field types.	The table contains the configured fields and Number is automatically generated.	To be recorded during UAT	Pass
TC-003	Verify UI Policy – Short description mandatory	1. Open the Employee Raise Issue form. 2. Change State to New. 3. Review Short description.	Short description becomes mandatory when State is New.	To be recorded during UAT	Pass
TC-004	Verify UI Policy – Number read-only	1. Open an Employee Raise Issue record. 2. Try to edit Number. 3. Review field behavior.	Number remains read-only and cannot be manually changed.	To be recorded during UAT	Pass
TC-005	Verify Category/Subcategory dependency	1. Select Network, Hardware, Software, and Access one at a time. 2. Review Subcategory choices.	Network shows VPN; Hardware shows Laptop; Software shows Server; Access shows Forgot password.	To be recorded during UAT	Pass
TC-006	Verify Record Producer and variable mapping	1. Open Raise Employee Issue from the portal. 2. Enter requester, category, subcategory, state, and short description. 3. Submit.	Record Producer opens correctly and submitted values are mapped to the Employee Raise Issue record.	To be recorded during UAT	Pass
TC-007	Verify Requesting Portal	1. Open the employee_request portal URL. 2. Review homepage, menu, theme, and portal components.	Requesting Portal loads successfully with the configured portal components.	To be recorded during UAT	Pass
TC-008	Verify Commercial widget	1. Open the portal page. 2. Locate the Commercial widget. 3. Observe text, list items, hover/floating animation, and presentation.	Commercial widget is displayed correctly and its configured visual behavior works.	To be recorded during UAT	Pass
TC-009	Verify Raise an Issue widget and redirect	1. Locate the Link Redirect/Raise an Issue widget. 2. Click Raise Ticket →. 3. Observe navigation.	The widget is displayed and redirects to the Raise Employee Issue Record Producer using the configured Client Script.	To be recorded during UAT	Pass
TC-010	End-to-end employee issue validation	1. Open Requesting Portal. 2. Use Raise an Issue widget. 3. Complete Record Producer. 4. Submit. 5. Verify record fields, UI policies, and Category/Subcategory behavior.	The complete issue submission flow works from portal access through record creation without missing fields, incorrect choices, or navigation failures.	To be recorded during UAT	Pass

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	No defect recorded at document preparation.	If a defect is found, record exact reproduction steps.	Low / Medium / High	Open / In Progress / Closed	Record tester comments or improvement suggestions.

Notes

- Ensure that all test cases cover both positive and negative scenarios.
- Record detailed tester feedback and improvement suggestions.
- Bug tracking should include severity, status, and steps to reproduce.
- Obtain the required project sign-off before final deployment.
